

Multiple choice questions with clickable animations as the possible answers are very useful especially if you want to create a list of statements each with its yes/no, true/false, etc. answer.

To add a multiple choice question with clickable animations:

- 1) Click on the **Multiple choice question** button from your toolbox:

- 2) A sub-menu will appear. Select the **Clickable animations** option:

A textfield and an animation placeholder will appear at the top-left of your screen: enter the text of your question in the textfield (**Enter your question text here**). The animation placeholder is your first possible answer.

You will also see the Question object (select this object every time you want to change any of the question properties):
