

It is possible that when you are in the process of building a course, you will need to change the name or description of an existing question page.

To change the details of any question page currently in your course structure:

- 1) Click on the name of the question page you want to amend:

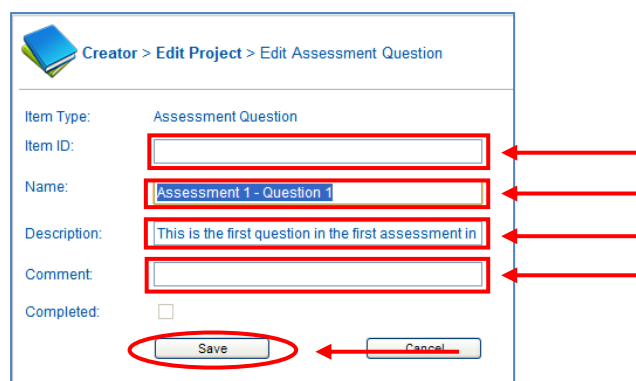

- 2) The **Edit Question** screen will appear.

In the **Name** and **Description** boxes, overwrite the existing details with the new title and description for your question page.

The **Item ID** box can be used to assign the page a reference code.

The **Comments** box is used to add any comments for the project 'Reviewer'.

When all the details have been amended, click on the **Save** button.

The question page will now display the new details in the course structure.
