

Grouping Objects

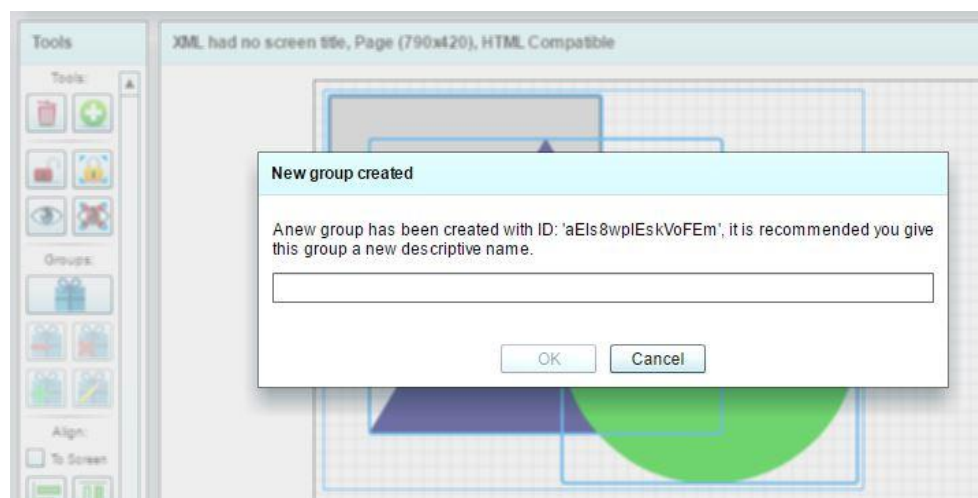

When objects are grouped, you are able to move them, hide them, or delete them all at the same time with one action only.

Shift left click with your mouse to select the multiple objects you wish to group together.

Within the **Tools** toolbar, select the **Group objects** button.

A pop-up window will appear titled **New group created**. Enter a name the new group and select **OK**.

Once the group is created the objects will have a yellow border when selected.
