

Removing a Logo From a Published SCORM Shell

If you'd like to remove the Learning Nexus from the shell of any SCORM published from Nimbus Course Builder this can be achieved following the following simple steps.

1) Download the SCORM file for your course, as described in:

https://support.learningnexus.co.uk/hc/en-us/article_attachments/212770988/publishing-a-course-for-use-via-a-lms-1.pdf

HTML-TEMPLATE-project-sco.zip

2) Open the SCORM zip file and locate the folder 'media_shell'.

3) Open the 'media_shell' folder, locate the 'default-vendor-logo.png' file and delete the file.

4) Once deleted, you can complete the remaining process of uploading the SCORM zip file to your LMS. It will now launch without the Learning Nexus logo.
